REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art Donnelly et al. "20050045058" discloses a locomotive an integrated method for monitoring, controlling, and/or optimizing an electrically powered locomotive. However, the prior art and other prior art of record fail to disclose a first indicator configured to be displayed in a first color when an anomalous condition is detected in either the anti-lock braking system or the regenerative braking system; and a second indicator configured to be displayed in a second color different from the first color when the anti-lock braking system is active, thereby providing a visual feedback to an operator. These limitations in combination in an instrument panel for a vehicle are neither taught nor obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Donnelly et al. (U.S. Pub 20050045058) discloses a method for monitoring and controlling locomotives.
